GitHub : github.com/pujithreddy
Email:pujithsathambakam@gmail.com
Mobile: +91 9550985411

SKILLS

Programming Languages & Web: Python, C, C++, Java, HTML, CSS, JavaScript,React,Node
Database & Operating Systems: RDBMS, SQL,MongoDB, Linux, Windows
Tools/Platforms: Git, GitHub, Power BI, Excel, VS Code, Jupyter, IDLE, MySQL
Data Analytics & AI: Predictive Analytics, Machine Learning, Prompt Engineering, LLMs
Areas of Interest: Data Structures and Algorithms, Computer Networks, Operating System
Soft Skills: Adaptability, Problem Solving, Analytical Thinking, Team Player

INTERNSHIP

Infosys Springboard Virtual Internship 6.0 | Intern (Batch-13) — Feb'26-Present

AI Powered Knowledge Engine for Smart Support and Ticket Resolution

- Developed an AI-powered ticket resolution system using Python, Lang Chain, and Ollama (LLM), enabling automated generation of contextual responses and reducing manual support effort
- Implemented a RAG (Retrieval-Augmented Generation) pipeline using FAISS vector database and embeddings, improving accuracy of solutions through semantic search and relevant knowledge retrieval
- Built an end-to-end ticket processing system with document ingestion (PyPDFLoader), text chunking, and SQLite backend, enabling efficient data handling and simulating real-world helpdesk automation

MERN Stack Internship | Webstack Academy — Dec'25-Feb'26

Project: Synthesia (Music Streaming Platform)

- Completed a mentor-guided MERN stack internship, gaining hands-on experience in full-stack web development, client-server architecture, and frontend–backend integration
- Developed a music streaming platform (Synthesia) using MongoDB, Express.js, React, and Node.js, implementing features like **user** interaction, content management, and RESTful API integration
- Applied core web development principles and best practices, delivered technical presentations, and successfully earned an internship completion certificate based on performance evaluation

PROJECTS

Synthesia - Music Streaming Platform — Dec'25-Feb'26

- Developed a full-stack music streaming platform using the MERN stack, providing users with a responsive and interactive listening experience.
- Built and integrated RESTful APIs with Node.js, Express, and MongoDB to manage music content and user data efficiently.
- Designed a modern frontend using React (Vite) and Tailwind CSS, focusing on modular components and smooth UI interactions.

Tech Used: MERN Stack (MongoDB, Express.js, React, Node.js), RESTful APIs, Tailwind CSS

Election Data Visualization — Jan'25-Apr '25

- Analyzed 10,000+ voting records to uncover turnout trends and voter behavior patterns using structured EDA.
- Built a visualization workflow in Python (Pandas, NumPy, Matplotlib, Seaborn) with 5+ data cleaning and transformation steps.
- Delivered 25% more accurate election insights using the visualization workflow, enabling clearer trend interpretation from cleaned and transformed datasets.

Tech Used: Python, Seaborn, Matplotlib, Pandas

Diabetes Prediction System — Apr'25-Jun'25

- Analyzed 700+ patient records using exploratory data analysis (EDA), including data cleaning, handling missing values, and identifying key health factors influencing diabetes risk.
- Built a machine learning pipeline using Python and Scikit-learn, incorporating preprocessing, feature selection, and model training with validation techniques.
- Achieved strong prediction accuracy using performance metrics like accuracy and recall, enabling effective early-stage diabetes risk assessment.

Tech Used: Predictive Analytics, Python

CPU Scheduler Simulator Aug'24-Dec'24

- Created simulator to model various CPU scheduling algorithms, including First-Come-First Serve (FCFS), Shortest Job First (SJF), and Round Robin.
- Applied front-end web technologies to build an interactive interface for real-time CPU scheduling simulation and comparison
- Improved understanding of CPU scheduling efficiencies and trade-offs by 40% through interactive comparison and visualization of algorithms.
  Tech Used: HTML, CSS, JavaScript

SUMMER TRAINING

From Data to Decisions: A Hands-On Approach to Data Science |LPU | Jun'25-Jul'25

- Learned foundational to advanced concepts in Python, Excel analytics, SQL querying, Power BI reporting, and Machine Learning through hands-on modules and guided practice sessions
- Developed data preprocessing workflows, SQL queries, Excel statistical models, and Power BI dashboards, and applied ML techniques to real datasets, improving analytical accuracy and insight generation by **30%**
- Earned certification for completing hands-on training in data analytics and machine learning.

CERTIFICATES | CERTIFICATIONS

- Build Generative AI Tools with No Code | Infosys SpringBoard Sep'25
- ChatGpt-4 Prompt Engineering | Infosys SpringBoard Aug'25
- Cloud Computing | NPTEL Apr'25

EXTRACURICULAR ACTIVITES

- Contributed As Member At Coding Blocks Student Club| LPU jan'24-Present
- Participated in Inter-University Hackathon| Code-A-Haunt| Feb'24

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelors of Technology - Computer Science and Engineering: CGPA: 6.2 Aug'23 - Present

Mangal Vidayalayam Chittoor, Andhra Pradesh
Intermediate: Percentage: 74% Apr'22 – Mar'23

Mangal Vidyalayam Chittoor, Andhra Pradesh
Matriculation: Percentage: 80% Apr'20 – Mar'21
